PROFESSIONAL SUMMARY

MCA graduate specializing in Artificial Intelligence and Full-Stack Development, currently contributing to Generative AI research at Talrop. Skilled in building intelligent systems, deep learning pipelines, and scalable web applications. Passionate about leveraging AI to drive innovation, efficiency, and meaningful digital transformation.

EDUCATION

Master of Computer Applications (MCA), *Cochin University of Science and Technology (CUSAT)* 2023–2025
CGPA: 7.9 / 10

Bachelor of Computer Applications, *St. George's College, Aruvithura* 2020–2023
CGPA: 6.8 / 10

Class XII (Computer Science), *Cherupushpam Girls HSS* 2020
Percentage: 91.2%

Class X, *St. Francis School* 2018
Percentage: 88.6%

TECHNICAL SKILLS

Programming Languages	Python, Java, C, C++
Frameworks & Libraries	Django, FastAPI, React, Flutter
Frontend Technologies	HTML, CSS, JavaScript
Databases	MySQL, SQLite, PostgreSQL, MongoDB
AI/ML Tools	YOLOv8, OpenCV, PyTorch, TensorFlow, NumPy, Pandas
Dev Tools & Platforms	Git, GitHub, GitLab, Docker, Postman, VS Code
Design Tools	Figma, Canva, GIMP

PROJECTS

SnapCal – AI-Powered Calorie Tracker *FastAPI, Expo Go, YOLOv8, FatSecret API*

- Built a computer vision system that identifies food items from images and estimates calorie content in real time.
- Trained YOLOv8 model achieving 93.5% mAP@0.5 and 84.1% mAP@[0.5:0.95].
- Integrated FatSecret API for dynamic nutritional data retrieval and meal analysis.
- Developed cross-platform frontend using Expo Go and backend API with FastAPI.

OpenUI – CNN-Based UI Element Detector *Python, OpenCV, TensorFlow*

- Designed and trained a Convolutional Neural Network to identify UI components (e.g., buttons, text fields, icons) from screenshots.
- Converted detected elements into structured JSON representations for potential code generation workflows.
- Experimented with CNN architecture tuning and image preprocessing for improved detection accuracy.

INTERNSHIPS

GenAI Intern – Talrop (Steyp)

Feb 2025 – Present

- Developed automation tools for PDF chapter segmentation using bookmark-based analysis.
- Contributed to prompt engineering and optimization for LLM workflows in Generative AI systems.

Intern Developer – Team Cloud Event France (Kochi Digital)

Dec 2024 – Apr 2025

- Built diocesan event management platform (for Holy Mass, baptisms, weddings, etc.) using Django and JavaScript.
- Implemented scheduling workflows and form-based CRUD modules for priests and administrators.

ACTIVITIES & INTERESTS

- Core Member – STACC (Programming Club, CUSAT)
- Member – Entities (AI Club, CUSAT)
- Personal interests: Music, reading, cinema, Formula 1

LANGUAGES

English (Fluent)

Malayalam (Native)

German (A1 – telc Certified)
